

MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three and nine months ended September 30, 2021

This Management’s Discussion and Analysis (“MD&A”) of the financial position and results of operations of Marimaca Copper Corp. (“Marimaca Copper” or the “Company”) has been prepared based on information available to the Company as at November 12, 2021, and should be read in conjunction with Marimaca Copper’s unaudited condensed interim consolidated financial statements and related notes thereto as at and for the three and nine months ended September 30, 2021 (the “Financial Statements”). The Financial Statements and MD&A are presented in U.S. dollars and have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Standards Board. Reference herein of \$ is to the United States dollars and C\$ is to the Canadian dollar.

Readers are cautioned that the MD&A contains forward-looking statements and that actual events may vary from management’s expectations. Readers are encouraged to read the “Cautionary Statement on Forward-Looking Information” at the end of this MD&A and to consult Marimaca Copper’s Financial Statements for the three and nine months ended September 30, 2021 and the corresponding notes to the Financial Statements which are available on our website at www.marimaca.com and on SEDAR at www.sedar.com.

Additional information related to Marimaca Copper, including our Annual Information Form (“AIF”), is available under the Company’s profile on SEDAR at www.sedar.com and the Company’s website at www.marimaca.com.

1 Overview

Marimaca Copper is a Canadian publicly-listed exploration and development company focused on exploring for and developing new copper deposits in Chile. The Company's shares are traded on the Toronto Stock Exchange ("TSX") under the symbol "MARI".

The Company's principal asset is the Marimaca Project, a copper deposit located in the Antofagasta Region of northern Chile. In August 2020, Marimaca Copper released a Preliminary Economic Assessment ("PEA") for the Marimaca Project which confirmed its potential to be a low capital cost, high margin, copper mine.

The Company continues to focus on the development of the Marimaca Project while concurrently exploring its extensive land holding for additional copper mineralization. This larger area is referred to as the Marimaca District.

2 Highlights

The following are some highlights for the first nine months of 2021:

- Intersected high grade extensions below the Marimaca Oxide Deposit ("MOD") comprising mixed, enriched and some primary sulphide mineralization, indicating the potential for expansion of the MOD's future leachable Mineral Resource Estimate;
- A total of 3,120 metres ("m") in 12 re-entry holes was drilled as extensions from the bottom of the historic MOD drill holes and was aimed to test the continuation of mineralization below the existing resource pit shell;
- Over 2,770 m over 14 shallow holes of reverse circulation ("RC") drilling was completed at Robles with broad zones of mineralization encountered;
- Completed RC drilling in 17 holes, totalling 4,370 m at Mercedes, intersecting significant copper mineralization from surface;
- Extensive mapping and sampling was conducted at small scale historic underground workings at Mercedes;
- Completed 2,690m of RC drilling in 9 holes at Cindy, intersecting significant mineralization, extending the strike length to over 800 m;
- Completed 3,222 m of drilling, targeting the sulphide mineralization below the MOD with results highlighting several interesting extensions to known mineralization;
- Announced the restructuring of the executive management team;
- Commenced an option study to determine the optimal development strategy for the MOD;
- Continued with Phase 5 metallurgical test-work;
- On March 1, 2021, the Company announced the completion of a non-brokered private placement pursuant to which it issued 9,377,273 units ("Units") at a price of C\$3.30 per Unit for gross proceeds of C\$30.9 million (\$23.8 million). Each Unit comprises one common share of the Company (a "Common Share") and one-half of one Common Share purchase warrant of the Company (each whole warrant, a "Warrant"). Each Warrant entitles the holder to purchase one additional Common Share at an exercise price of C\$4.10 until December 3, 2022. In connection with the private placement, the Company issued 181,545 Common Shares related to share issue costs. GSII and Greenstone Co-Investment No. 1 (Coro) LP (collectively, "Greenstone") elected to acquire

4,205,333 Units pursuant to the exercise of pre-emptive rights, resulting in additional gross proceeds of approximately C\$13.9 million (\$11.0 million); and

- Appointment of Mr. Clive Newall to the Board of Directors.

Impact of the COVID-19 Pandemic

The COVID-19 global health pandemic has had a significant impact on the global economy and commodity and financial markets. The full extent and impact of the COVID-19 pandemic is unknown. The adverse effects of the pandemic may continue for an extended and unknown period of time, particularly as variant strains of the virus are identified. The impact of the pandemic to date has included extreme volatility in financial markets, a slowdown in economic activity, extreme volatility in commodity prices and has raised the prospect of an extended global recession. Efforts have been undertaken to slow the spread of the COVID-19 pandemic, the operation and development of mining projects has been impacted. The broader impact of the COVID-19 pandemic or future pandemics or similar public health emergencies on investors, businesses, the global economy or financial and commodity markets may also have a material adverse impact on Marimaca Copper's results of operations, financial condition and the trading price of Marimaca Copper's securities.

3 Outlook

Following the completion of the drilling program, the exploration team focused on interpretation and geological modeling. Planning and development of an infill drilling of the MOD and the extensions below the MOD have begun with construction of access and platforms expected to begin in mid November. Following the completion of the infill drilling campaign, the Company is planning to release an updated Mineral Resource Estimate.

The Company continues to advance metallurgical test work with the expectation that the results of its Phase V met testing campaign will be completed and released during the remainder of 2021 and early 2022.

The Company will continue to advance the option study which will outline the optimal development plan for the Marimaca Project. The development plan will be used to identify key engineering required to prepare and potentially file the environmental permit applications with the Chilean authorities. The Company has begun preliminary engineering studies, such as hydrogeology, hydrology, geotechnical evaluations and additional environmental baseline studies covering the project areas.

4 Marimaca

Location & Mineral Resource Estimate

Marimaca is the Company's flagship asset and is located in the Antofagasta Region of northern Chile. The Marimaca Project is recognised for its exceptional location, just 14 kilometres from the highway and powerlines, 25 kilometres from the port of Mejillones and 45 kilometres from the regional capital of Antofagasta.

In December 2019, the Company released an independent National Instrument 43-101 compliant Mineral Resource Estimate ("MRE") that was based on 346 reverse circulation holes ("RC") and 39 diamond holes ("DD") for a total of 91,210m drilled between 2016 and 2019 and was completed at a range of Cut-Off grades by independent consultants NCL Ingeniería y Construcción SpA ("NCL"). The MRE comprises 70 million tonnes, with an average grade of 0.60% total copper within the Measured & Indicated Categories of mineral resources (approximately 420Kt of contained copper), and 40 million tonnes with an average grade of 0.52% total copper within the Inferred Category of mineral resources (approximately 224kt of contained copper). The full technical report titled *"Updated and Expanded Resource Estimate for the Marimaca Copper Project, Antofagasta Province, Region II, Chile"* can be found on SEDAR at www.sedar.com.

The MRE is summarized in the table below:

Table 1: NI43-101 Mineral Resource Estimate at Various Cut-off Grades

Cut-Off Grade (% CuT)	Measured			Indicated			Measured + Indicated			Inferred		
	Mineral kt	CuT (%)	CuS (%)	Mineral kt	CuT (%)	CuS (%)	Mineral kt	CuT (%)	CuS (%)	Mineral kt	CuT (%)	CuS (%)
0.40	14,403	0.81	0.55	30,600	0.74	0.48	45,003	0.76	0.50	23,607	0.70	0.40
0.30	17,865	0.72	0.49	40,253	0.64	0.42	58,118	0.67	0.44	33,410	0.60	0.35
0.22	20,721	0.66	0.44	49,666	0.57	0.37	70,387	0.60	0.39	43,015	0.52	0.31
0.18	22,072	0.63	0.42	54,109	0.54	0.35	76,181	0.57	0.37	47,164	0.49	0.29
0.10	23,087	0.61	0.41	57,619	0.52	0.33	80,706	0.54	0.35	50,641	0.47	0.27

* CuT means total copper and CuS means acid soluble copper. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource technical and economic parameters included: copper price US\$3.00/lb; mining cost US\$2.00/t; HL processing cost including G&A US\$9.00/t; ROM processing cost including G&A US\$2.50/t; selling cost US\$0.07/lb Cu; heap leach recovery 76% of CuT; ROM recovery 40% of CuT and a 44°-46° pit slope angle.

Preliminary Economic Assessment ("PEA")

In August 2020, the Company released a PEA for the Marimaca Project which confirmed its potential to be a low capital cost, high margin, copper mine. It is significantly advantaged by its location with easy access to infrastructure including power, transport and water as well as a highly skilled, local, work force and simple logistics. The full technical report titled *"PRELIMINARY ECONOMIC ASSESSMENT MARIMACA PROJECT ANTOFAGASTA, II REGION, CHILE NI 43 101 Technical Report"* can be found on SEDAR at www.sedar.com.

Summary of Economic Assumptions and Results in the PEA are presented in the table below:

Table 2: Summary of Economic Assumptions and Results

<i>Copper Price Assumption</i>	US\$3.15/lb flat real
<i>Pre-Tax NPV₈ & IRR</i>	US\$757 million / 39.9%
<i>Post-Tax NPV₈ & IRR</i>	US\$524 million / 33.5%
<i>Payback Period from First Production</i>	2.6 years
<i>Pre-Production Capital Costs</i>	US\$285 million ¹
<i>Life of Mine Sustaining Capital</i>	US\$66 million
<i>Ave. Annual Steady State EBITDA</i>	US\$169 million
<i>Life of Mine C1 Operating Costs</i>	US\$1.22/lb of copper ²
<i>Life of Mine All-in-Sustaining Cash Costs</i>	US\$1.29/lb of copper ³
<i>Mine Life</i>	12 years
<i>Ave. Annual Metal Production (first 6 years)</i>	Approximately 40,000 tonnes
<i>Ave. Annual Metal Production Life of Mine (incl. ramp up)</i>	35,600 tonnes
<i>Steady State Average Process Recovery (Heap and ROM)</i>	76% / 40%

¹ Assumes mining fleet is financed through a lease to own contract structure to minimize upfront capital cost.

² All in sustaining costs is defined as cash cost (C1) plus general and administrative expenses, sustaining capital expenditure, deferred stripping, royalties and lease payments and is used by management to evaluate performance inclusive of sustaining expenditure required to maintain current production levels.

³ C1 cash cost includes all mining and processing costs less any profits from by-products and is used by management to arrive at an approximated cost of finished metal.

The PEA's sensitivities are as follows:

Table 3: Sensitivity Analysis to Copper Price, Life of Mine Capital and Operating Costs

Copper Price US\$/lb	Post-Tax NPV ₈ Base Case US\$ millions	Post-Tax NPV ₈ Capex (-10%) US\$ millions	Post-Tax NPV ₈ Capex (+10%) US\$ millions	Post-Tax NPV ₈ Opex (-10%) US\$ millions	Post-Tax NPV ₈ Opex (+10%) US\$ millions	Base Case IRR (%)
2.85	408	434	381	455	360	28.6%
3.00	466	492	439	514	418	31.1%
3.15	524	550	498	572	476	33.5%
3.30	582	608	556	630	535	35.7%
3.45	640	666	614	688	592	38.0%

The PEA was prepared in accordance with the requirements of the National Instrument 43-101, Standards of Disclosure for Mineral Projects, ("NI 43-101") and is based on the MRE completed by NCL outlined above. The PEA is considered preliminary in nature and includes Inferred Mineral Resources that are considered too speculative, geologically, to have the economic considerations applied that would enable classification as Mineral Reserves. There is no certainty that the conclusions within the PEA will be realized. The PEA is based on the material assumptions including assumptions about the availability of funding. While the Company considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the PEA can be achieved.

No Mineral Reserves have been estimated for the Marimaca Project. Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

5 Financial Position Review

The Company is an exploration and development company that currently does not generate revenue from its assets. At September 30, 2021, the Company had cash and cash equivalents of \$36.4 million (December 31, 2020 - \$13.9 million), working capital of \$29.7 million (December 31, 2020 - \$9.1 million), total assets of \$97.7 million (December 31, 2020 - \$70.0 million), total liabilities of \$12.2 million (December 31, 2020 - \$12.8 million) and recorded a net loss of \$14.0 million for the first nine months of 2021 (2020 - Net income of \$4.9 million).

During the three and nine months ended September 30, 2021, the Company capitalized \$1.0 million and \$5.1 million, respectively, to exploration and evaluation assets which was comprised of exploration activities and property option payments.

Total liabilities of \$12.2 million (December 31, 2020 - \$12.8 million) included accounts payable and accrued liabilities of \$1.1 million (December 31, 2020 - \$2.2 million), acquisition debt of \$6.1 million (December 31, 2020 - \$5.6 million) and a restoration provision of \$5.0 million (December 31, 2020 - \$4.9 million).

On March 1, 2021, the Company issued 13.6 million common shares and 6.8 million Warrants in connection with a private placement, as described in the Highlights section above, which resulted in net proceeds of \$35.9 million. The

Company issued 0.2 million common shares, valued at \$0.7 million, for services received in connection with the private placement.

Marimaca 1-23 Claims Acquisition (“Acquisition Debt”)

On February 14, 2020, and later amended in May 2020, the Company signed the definite agreements acquiring the remaining 49% interest in the 1-23 Claims for a total cash payment of \$12.2 million which is payable as follows: (i) \$6.0 million upon signing of the definitive agreements; (ii) \$3.2 million in October 2021; and (iii) \$3.0 million in February 2022. The sellers agreed to transfer their 49% interest in the 1-23 Claims upon the execution date of the definitive agreements. The Company paid the initial \$6.0 million upon execution of the definitive agreement and recorded the fair value of the remaining two instalments as a liability. As at September 31, 2021, the fair value of the future instalments was estimated to be \$6.1 million.

Restoration Provision

The Company’s restoration provision of \$5.0 million is associated with its Ivan Plant, which continues to be on care and maintenance.

In calculating the present value of the restoration provisions as at September 30, 2021, management used risk-free rates between 1.6% -1.95% and inflation rates between 2.02% -2.12%. The undiscounted cash flows, before inflation adjustments, estimated to settle the restoration provisions are approximately equal to the discounted cash flows. No changes to the retirement plans were identified to reflect the impact of COVID-19, but the Company will continue to closely monitor future inflation rates and other variables which may result in adjustments to the carrying value of the restoration provisions.

Commitments and Option Payments

The following table shows the contractual obligations of the Company including property options payments:

Table 4: Option Payments

<i>(In thousands of US dollars)</i>	2021	2022	2023	TOTAL
La Atómica	\$ 2,649	\$ -	\$ -	\$ 2,649
Atahualpa	-	1,600	-	1,600
Olimpo & Cedro	1,086	3,550	-	4,636
Llanos y Mercedes	125	275	1,400	1,800
Akicy, Emilia & La Esperada	115	220	600	935
Total	\$ 3,975	\$ 5,645	\$ 2,000	\$ 11,620

La Atómica Claims

Under the terms of the August 2017 La Atómica Letter of Intent (“LOI”) (Option Agreement signed October 2017), the Company may acquire 100% of the La Atómica property by paying a total of \$6.0 million as follows: \$0.6 million (paid); \$1.0 million (paid) on the 24-month anniversary date; and \$4.4 million on the 36-month anniversary date. A 1.5% NSR is payable on the claims, with the Company retaining an option to purchase 0.5% out of the 1.5% NSR for \$2 million at any time.

In June 2020, the Company modified the Option Agreement to split into three tranches the \$4.4 million payment due on the 36-month anniversary payable as follows: (i) \$1.0 million on the 36-month anniversary of the original agreement (paid); (ii) \$1.1 million on the 41-month anniversary (paid), and (iii) \$2.6 million on the 47-month anniversary (paid). The last two installments include \$0.7 million in interest calculated at a monthly rate of 0.9%.

Atahualpa Claims

Under the terms of a January 2018 LOI, the Company acquired 100% of the claims of Atahualpa, Tarso and Sorpresa immediately adjoining its Marimaca property for a total cash consideration of \$6.0 million (paid). A 2% NSR is payable on the claims under the original option agreement.

On February 1, 2019, the Company entered into an option agreement to purchase the outstanding 2% NSR for \$2.2 million. The amount is payable in four tranches over 36 months as follows: \$0.2 million upon closing (paid); \$0.2 million on the 12-month anniversary of closing (paid); \$0.2 million on the 24-month anniversary of closing (paid); and \$1.6 million on the 36-month anniversary of closing.

Olimpo and Cedro (formerly called Naguayán)

Under the terms of a January 2018 option agreement, the Company may acquire 100% of the Olimpo & Cedro properties for a total cash consideration of \$6.5 million: \$0.2 million upon signing (paid); \$0.3 million on the 12-month anniversary date (paid); \$0.7 million on the 24-month anniversary date (paid); \$1.75 million on the 36-month anniversary date; and \$3.55 million on the 48-month anniversary date. A 1.5% NSR is payable, with the Company retaining an option to purchase 0.5% of the 1.5% NSR for \$2 million within the first 12 months following the start of commercial production on the property. As these claims are not adjacent to the known mineralization, only acquisition costs are capitalized at this time.

In May 2020, the Company modified the Option Agreement to split into three tranches the \$1.75 million payment due on the 36-month anniversary payable as follows: (i) \$0.6 on the 36-month anniversary of the original agreement (paid); (ii) \$0.2 million on the 38-month anniversary (paid), and (iii) \$1.1 million on the 48-month anniversary (paid). The last installment includes \$0.1 million interest calculated at a monthly rate of 0.9%.

Llanos and Mercedes

Under the terms of a May 2019 option agreement, the Company may acquire the Llanos and Mercedes properties for a total consideration of \$2.0 million payable as follows: \$0.05 million upon signing (paid); \$0.05 million on the 16-month anniversary (paid); \$0.1 million on the 24-month anniversary (paid); \$0.125 million on the 30-month anniversary (paid); \$0.125 million on the 36-month anniversary; \$0.15 million on the 42-month anniversary, and \$1.4 million on the 48-month anniversary. These claims are subject to a 1% NSR with a buyback option for the NSR for \$0.5 million exercisable up to 24 months from the start of commercial production. As these claims are not located adjacent to the known mineralization, only acquisition costs are capitalized at this time.

On April 17, 2020, the Company amended the original option agreement to extend the payment due on the 12-month anniversary of the agreement to 16-month anniversary. The other terms and provisions included in the original agreement will remain unchanged.

Akicy

Under the terms of a July 2020 option agreement, the Company may acquire the Cindy 1-10 and La Esperada 1-17 properties for a total consideration of \$0.5 million payable as follows: \$0.01 million upon signing (paid); \$0.08 million on the 12-month anniversary (paid); \$0.11 million on the 24-month anniversary; and \$0.3 million on the 36-month anniversary. These claims are subject to a 1.5% NSR with a buyback clause to buy a 0.5% NSR for \$0.5 million exercisable at any time. As these claims are not located adjacent to the known mineralization, only acquisition costs have been capitalized.

Emilia

Under the terms of an August 2020 option agreement, the Company may acquire the Emilia 1-10 properties for a total consideration of \$0.5 million payable as follows: \$0.01 million upon signing (paid); \$0.08 million on the 12-month anniversary (paid); \$0.11 million on the 24-month anniversary; and \$0.3 million on the 36-month anniversary. These claims are subject to a 1.5% NSR with a buyback clause to buy a 0.5% NSR for \$0.5 million exercisable at any time. As these claims are not located adjacent to the known mineralization, only acquisition costs have been capitalized.

La Esperada

Under the terms of a December 2020 purchase agreement, the Company acquired the La Esperada 1-17 (6-10 and 16-17) properties for a total consideration of \$0.25 million payable as follows: \$0.13 million upon signing (paid) and \$0.12 million on the 12-month anniversary. These claims are subject to a 1.5% NSR with a buyback clause to buy a 0.5% NSR for \$0.3 million exercisable at any time. As these claims are not located adjacent to the known mineralization, only acquisition costs have been capitalized at this time.

6 Expenditure Review

Table 5: Expenditures Summary

<i>(In thousands of US dollars)</i>	Three months ended September 30,		Nine months ended September 30,	
	2021	2020	2020	2019
Expenses				
Exploration expenditures	\$ 1,777	\$ 166	\$ 5,070	\$ 1,261
Care and maintenance costs	254	207	1,092	1,357
Depreciation and amortization	30	54	35	139
Legal and filing fees	30	52	172	163
Other corporate costs	10	266	343	601
Salaries and management fees	614	149	1,235	478
Share-based compensation	1,240	1,382	5,944	1,607
Operating loss	(3,955)	(2,276)	(13,891)	(5,606)
Finance expense	(219)	(343)	(362)	(2,212)
Foreign exchange loss (gain)	180	69	206	(40)
Gain on asset disposal	-	-	-	12,688
Other expense (income)	-	-	-	79
Net income (loss)	\$ (3,994)	\$ (2,550)	\$ (14,047)	\$ 4,910
<i>Items that may be subsequently reclassified to net income:</i>				
Foreign currency translation adjustment	(1,057)	(12)	(88)	(97)
Total comprehensive (loss) income	\$ (5,051)	\$ (2,562)	\$ (14,135)	\$ 4,813

Three months ended September 30, 2021 (“Q3 2021”) compared to three months ended September 30, 2020 (“Q3 2020”)

For the three months ended September 30, 2021, the Company recorded a net loss of \$4.0 million compared to a net loss of \$2.6 million in Q3 2020. The increase in the loss is attributable to higher exploration costs associated with the Company’s 2021 drilling campaigns, salaries and management fees due to a restructuring which occurred in Q2 2021, partially offset by lower corporate costs and finance expenses.

Exploration costs increased to \$1.8 million when compared to the comparable period of \$0.2 million, as the Company initiated a robust drill program to test the MOD deep extension and the wider regional Marimaca district, as described in Section 4. Care and maintenance costs remained stable at \$0.2 million for both periods.

Share-based compensation, related to the vesting of previously granted stock options and restricted shares units (“RSUs”) was \$1.2 million for Q3 2021 and \$1.4 million for Q3 2020. The slight decrease is due to the timing of vesting provisions in the associated grants.

Salaries and management fees increased from \$0.1 million in Q3 2020 to \$0.6 million in Q3 2021, due to the changes and the associated costs in the executive management team.

Finance fees decreased to \$0.2 million in Q3 2021 from \$0.3 million in Q3 2020. Finance fees comprise accretion costs on acquisition debt, restoration provision and right of use assets.

Overall expenses were negatively impacted by the strengthening of the US dollar relative to the Canadian and Chilean peso. During the quarter, the US dollar strengthened by approximately 5.8% relative to the Canadian dollar and 1.2% relative to the Chilean peso.

Table 6: Selected Quarterly Financial Information

<i>(in 000's except per share amounts)⁽¹⁾</i>	Q3 2021	Q2 2021	Q1 2021	Q4 2020

Cash provided by (used in) investing activities	\$ 1,029	\$ (877)	\$ (7,764)	\$ (2,708)

⁽¹⁾ Sum of all quarters may not add up to yearly total due to rounding.

⁽²⁾ All share outstanding numbers have been adjusted to reflect the 25:1 share consolidation completed in early 2020.

The Company does not generate revenues from its assets as it is an exploration and development company, focused on advancing its Marimaca Project. Historically, the Company has relied on equity financings and loan instruments to fund operations. Variances between the quarterly figures presented in Table 6 are generally due to (i) the availability of cash to fund operations; (ii) the completion of any debt or equity financings in the period; (iii) the deconsolidation of previous wholly-owned subsidiary; and (iii) the level of exploration/development and/or care & maintenance activities which is directly correlated to the availability of cash resources.

The main variances in cash and equivalents are due to the following: (i) the completion of equity financings in Q1 2021 and Q4 2020 for net proceeds of \$57.0 million; and (ii) the completion of a private placement in Q3 2019 raising gross proceeds of \$12.6 million. Total assets increased over the quarters due to property acquisitions and option payments. Total liabilities were significantly impacted by the divesture of a previous wholly-owned subsidiary in Q2 2020.

Nine months ended September 30, 2021 (“2021”) compared to nine months ended September 30, 2020 (“2020”)

For the nine months ended September 30, 2021, the Company recorded a net loss of \$14.0 million compared to net income of \$4.9 million for the same period of 2020. The loss is attributable to higher exploration expenditures, salaries and management fees and share-based compensation, as discussed below.

Exploration costs increased to \$5.1 million when compared to the comparable period of \$1.3 million, as the Company initiated a robust drill program to test the MOD deep extension and the wider regional Marimaca district, as described in Section 4. Care and maintenance costs decreased slightly to \$1.1 million in 2021 compared to \$1.4 million in 2020 due to the deconsolidation of a previously owned wholly-owned subsidiary

Legal and filing fees decreased to \$0.3 million in 2021 compared to \$0.6 million in 2020, due to the addition of an in-house general counsel in Q2 2021.

Salaries and management fees increased from \$0.5 million in 2020 to \$1.2 million in 2021, due to the changes and the associated costs in the executive management team.

Share-based compensation was \$5.9 million in the period compared to \$1.6 million in 2020. The increase is due to stock options and RSUs granted in late 2020 and early 2021. Share-based compensation is related to the vesting of stock options and RSUs in the period.

Finance fees decreased to \$0.4 million in 2021 from \$2.2 million in 2020, due to the repayment of an outstanding working capital loan in December 2020 and the divestiture of a previously wholly-owned subsidiary.

In 2020, the Company recorded a gain on asset disposal of \$12.7 million associated with the divestiture of a previously wholly-owned subsidiary.

In 2021, the US dollar strengthened against both the Canadian dollar and Chilean peso, resulting in a negative impact in overall expenses as the majority of expenses are incurred in Chilean pesos or Canadian dollars. The US dollar saw an increase of 7.4% and 8.1% relative to the Canadian dollar and Chilean peso, respectively.

Related Party Disclosure

Key Management Personnel

The Company considers all key management personnel having authority and responsibility for planning, directing, and controlling the activities of the entity, directly or indirectly, including any directors (whether executive or otherwise) of the entity as related parties.

Table 7: Related Party Costs

<i>(In thousands of US dollars)</i>	Three months ended September 30,		Nine months ended September 30,	
	2021	2020	2021	2020
Short-term employee benefits ⁽¹⁾	\$ 406	\$ 217	\$ 824	\$ 671
Share-based payments ⁽²⁾	1,193	1,363	4,599	1,522
Total	\$ 1,599	\$ 1,580	\$ 5,423	\$ 2,193

⁽¹⁾ Includes salary, benefits and short-term accrued incentives/other bonuses earned in the period.

⁽²⁾ Represents the expense of stock options and restricted share units during the period.

7 Other Assets

Ivan Plant

Purchased in June 2017, the Ivan Plant is not currently operational and is being kept on care and maintenance. In March 2020, the Company submitted an Environmental Impact Declaration (“DIA”) to renew its environmental and operating permits. In January 2021, the Environmental Qualification Resolution (“RCA”) was received from the Environmental authority. The next step is for the operational sector permits to be processed by Sernageomin, the Chilean governmental authority overseeing environmental issues.

Sierra Medina

Sierra Medina comprises a 14,505-hectare claim block located approximately 30 kilometres east of the Marimaca District, in the former Sierra Valenzuela copper district. Between 2011 and 2013, Minera Rayrock explored and discovered a volcanic-hosted manto-type copper deposit. The deposit is blind with mineralization starting at 50 m to 100 m below surface. Copper mineralization, grading close to 1% copper, consists of both copper oxide and sulphides mineralization. The deposit is open at depth and there are other copper prospects identified but not yet explored within the claim area. As part of the transaction to acquire the remaining 49% interest in the 1-23 Claims, the Company agreed to sell 144 hectares from the Sierra Medina claims that contained drilling information from the work that had been previously done by Minera Rayrock.

8 Outstanding Share Data Authorized and Issued

As at November 12, 2021, the number of common shares outstanding or issuable pursuant to other outstanding securities is as follows:

	Number
Outstanding	88,028,036
Stock options	6,766,071
Restricted Shares Units ("RSUs")	237,871
Warrants	11,069,054
Broker warrants	88,873
Total	106,189,905

⁽¹⁾ Stock Options have exercise prices ranging from C\$1.25 to C\$5.00 and expiries between August 2021 and May 2026.

⁽²⁾ Warrants have an exercise price of C\$4.10 per warrant and expire on December 3, 2022.

⁽³⁾ Broker Warrants have an exercise price of C\$3.15 per warrant and expire on December 3, 2022.

Stock Options

During 2020, the Company adopted a new incentive plan (the “Omnibus Plan”) which allows for the issuance of stock options and restricted share units (“RSUs”) and replaced the Company old stock option plan. The maximum number of common shares of the Company available for issuance under the Omnibus Plan will not exceed 10% of the Company’s issued and outstanding common shares, less the number of common shares subject to grants of stock options under the Company’s previous plan.

During the three and nine months ended September 30, 2021, the Company granted no stock options (Q3 2020 – 2.2 million) and 3.5 million stock options (2020 – 2.6 million), respectively. The stock options have a weighted average exercise price of C\$4.98 per stock option (2020 – C\$2.87) and a weighted average life of 5 years (2020 – 5 years). The fair value of the stock options was estimated to be C\$9.5 million in aggregate (2020 – C\$5.3 million).

Stock options were valued using the Black-Scholes option pricing model using the following weighted average assumptions to estimate the fair value of options granted: risk-free rate – 0.30%; volatility – 67%; expected life – 5 years and dividend yield – 0%.

RSUs

During the three and nine months ended September 30, 2021, the Company granted no RSUs (Q3 2020 – Nil) and 0.2 million RSUs (2020 – Nil) under its Omnibus Plan. The fair value of the RSUs was estimated using the Black-Scholes option pricing model using the following weighted average assumptions: risk-free rate – 0.28%; volatility – 73.1%; expected life – 3 years and dividend yield – 0%, and resulted in a fair value of C\$1.1 million.

During the three and nine months ended September 30, 2021, the Company recorded \$1.2 million (Q3 2020 - \$1.4 million) and \$5.9 million (2020 - \$1.6 million), respectively, as share-based compensation related to the vesting of certain stock options and RSUs.

Warrants

In March 2021, the Company issued 6.8 million Warrants in connection with the completion of the private placement described in Note 9(a) above. The Warrants were valued using the Black-Scholes option pricing model using the following assumptions: risk-free rate – 0.24%; expected life – 1.75 years; volatility – 61%; dividend yield – 0%, resulting in a fair value attributable to the warrants of C\$8.9 million (\$7.1 million).

During the nine months ended September 30, 2021, the Company issued 0.3 million common shares upon the exercise of Warrants for total cash proceeds of \$1.1 million.

9 Critical Accounting Estimates

Impact of the COVID-19 Pandemic

The COVID-19 global health pandemic has had a significant impact on the global economy and commodity and financial markets. The full extent and impact of the COVID-19 pandemic is unknown. The adverse effects of the pandemic may continue for an extended and unknown period of time, particularly as variant strains of the virus are identified. The impact of the pandemic to date has included extreme volatility in financial markets, a slowdown in economic activity, extreme volatility in commodity prices and has raised the prospect of an extended global recession. As well, as efforts have been undertaken to slow the spread of the COVID-19 pandemic, the operation and development of mining projects has been impacted. The broader impact of the COVID-19 pandemic or future pandemics or similar public health emergencies on investors, businesses, the global economy or financial and commodity markets may also have a material adverse impact on Marimaca Copper's results of operations, financial condition and the trading price of Marimaca Copper's securities.

Impairment of E&E Assets

The application of the Company's accounting policy for impairment of exploration and evaluation assets requires judgement to determine whether indicators of impairment exist, including factors such as: the period for which the Company has the right to explore has expired or will expire in the future, and is not expected to be renewed; substantive expenditures on exploration activities and evaluation of mineral resources in the specific area is neither budgeted or planned; exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources; and sufficient data exists to indicate that the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale. Management has assessed for impairment indicators on the Company's exploration and evaluation assets and has concluded that no impairment indicators exist as of December 31, 2020.

Impairment of PP&E

Each reporting period, property, plant and equipment assets are evaluated to determine whether there are any indications of impairment. If any such indication exists, an impairment test is performed and if indicated, an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount. The recoverable amount of an asset or cash generating unit is measured at the higher of the fair value less costs to sell and the value in use. The recoverable amount of the relevant cash generating units is calculated based on cash flow projections using assumptions and estimates that represent management's best estimate of the range of economic conditions that will exist over the remaining useful lives of the assets, and through a review of sales of comparative assets.

These calculations include key estimates such as future commodity prices, recoverable resources and reserves, operating and capital costs, inflation rate, discount rate and exchange rates. Although management has made its best estimate of these factors, it is possible that changes could occur in the near term that could adversely affect management's estimate of the net cash flows to be generated from its projects.

Decommissioning and restoration provisions

Each reporting period, the Company updates the carrying value of its restoration provisions by estimating the future costs of remediating environmental disturbances after an asset is decommissioned or retired. Management updates the provision using future inflation rates and interest rates for the periods in order to get a present value. Although management has made its best estimate of these factors, there are uncertainties related to asset retirement obligations and the impact on the financial statements could be material as the eventual timing and expected costs to settle these obligations could differ from our estimates. The main factors that could cause expected cash flows to differ are changes to laws, local regulations, increase in expected costs, inflation rates and timing of cash flows.

Share-based compensation

The Company applies the fair value method of accounting using the Black-Scholes model to determine the fair value of stock-options granted to employees, consultants and directors. The model includes significant assumptions as to the estimated life of the stock options, the forfeiture rate and the volatility of the stock. The Company uses historical data to estimate the expected future volatility of the stock, the estimated lives of the stock options and the forfeiture rate.

Stock options granted might include performance conditions related to the achievement of specified performance targets or a milestone and might pertain either to the performance of the Company as a whole or to some part of the enterprise, such as a subsidiary. The measurement of compensation costs for a stock-based award with a performance condition that will determine the number of options or shares to which all employees receiving the award will be entitled, is based on the best estimate of the outcome of the performance condition. The Company estimates forfeitures awards by individual employees and recognizes them as they occur. Management assesses all the factors and uses its judgment to calculate these estimates.

New and Amended Standards Adopted by the Company

IAS 16, Property, Plant and Equipment

The IASB issued an amendment to IAS 16, Property, Plant and Equipment to prohibit the deducting from property, plant and equipment amounts received from selling items produced while preparing an asset for its intended use. Instead, sales proceeds and its related costs must be recognized in profit or loss. The amendment will require companies to distinguish between costs associated with producing and selling items before the item of property, plant and equipment is available for use and costs associated with making the item of property, plant and equipment available for its intended use. The amendment is effective for annual periods beginning on or after January 1, 2022, with earlier application permitted. The Company is currently assessing the impact of IAS 16 but does not believe it will have a material impact on the financial statements.

IAS 1, Presentation of Financial Statements

The IASB issued an amendment to IAS 1, Presentation of Financial Statements to clarify one of the requirements under the standard for classifying a liability as non-current in nature, specifically the requirement for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period. The amendment includes: (i) specifying that an entity's right to defer settlement must exist at the end of the reporting period; (ii) clarifying that classification is unaffected by management's intentions or expectations about whether the entity will exercise its right to defer settlement; (iii) clarifying how lending conditions affect classification; and (iv) clarifying requirements for classifying liabilities an entity will or may settle by issuing its own equity instruments. An assessment will be performed prior to the effective date of January 1, 2023 to determine the impact to the Company's financial statements.

10 Disclosure

Internal Control over Financial Reporting and Disclosure Controls

Disclosure controls and procedures

Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified in the securities legislation and include controls and procedures designed to ensure that information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted under securities legislation is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Management, including the Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. As of December 31, 2020, the Chief Executive Officer and the Chief Financial Officer have each concluded that the Company's disclosure controls and procedures, as defined in NI 52-109 – Certification of Disclosure in Issuer's Annual and Interim Filings, are effective to achieve the purpose for which they have been designed.

Internal controls over financial reporting

Internal controls over financial reporting are designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with IFRS. Management is also responsible for the design of the Company's internal control over financial reporting in order to provide reasonable

assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

The Company's internal controls over financial reporting include policies and procedures that: pertain to the maintenance of records that, in reasonable detail accurately and fairly reflect the transactions and disposition of assets; provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with IFRS and that receipts and expenditures are being made only in accordance with authorization of management and directors of the Company; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the financial statements.

Because of their inherent limitations, internal controls over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Furthermore, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There have been no changes in our internal controls over financial reporting during the year ended December 31, 2020 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management, including the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's internal controls over financial reporting. As of December 31, 2020, the Chief Executive Officer and Chief Financial Officer have each concluded that the Company's internal controls over financial reporting, as defined in NI 52-109 - Certification of Disclosure in Issuer's Annual and Interim Filings, are effective to achieve the purpose for which they have been designed.

11 Cautionary Statement on Forward Looking Information

Certain information provided in this MD&A and any documents incorporated by reference herein may constitute "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information in this MD&A and any documents incorporated by reference herein includes but is not limited to information with respect to:

- the Company's expected production from, and the further potential of, the Company's properties;
- the future price of minerals, particularly gold and copper;
- estimations of mineral reserves and mineral resources;
- conclusions of economic evaluation;
- the realization of mineral reserve estimates;
- the timing and amount of estimated future production;
- costs of production;
- capital expenditures;
- success of exploration activities;
- mining or processing issues;
- currency exchange rates;
- government regulation of mining operations; and
- environmental risks.

Often, but not always, forward-looking information can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates”, or “believes” or variations (including negative variations) of such words and phrases, or statements that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved.

Forward-looking information is based on management’s expectations and reasonable assumptions at the time such statements are made. Estimates regarding the anticipated timing, amount and cost of exploration and development activities are based on assumptions underlying mineral reserve and mineral resource estimates and the realization of such estimates are set out herein. Capital and operating cost estimates are based on extensive research of the Corporation, purchase orders placed by the Corporation to date, recent estimates of construction and mining costs and other factors that are set out herein. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include:

- uncertainties of mineral resource estimates;
- risks and uncertainties inherent in and relating to estimates of future production and operations, cash and all-in sustaining costs;
- the nature of mineral exploration and mining;
- variations in ore grade and recovery rates; cost of operations;
- fluctuations in the sale prices of products;
- foreign currency fluctuations;
- volatility of mineral prices (including copper prices);
- exploration and development risks;
- liquidity concerns and future financings;
- risks associated with operations in foreign jurisdictions;
- potential revocation or change in permit requirements and project approvals;
- mining operations including but not limited to environmental hazards, industrial accidents, ground control problems and flooding;
- geology including, but not limited to, unusual or unexpected geological formations and events (including but not limited to rock slides and falls of ground), estimation and modelling of grade, tonnes, metallurgy continuity of mineral deposits, dilution, and mineral resources and mineral reserves, and actual ore mined or metal recoveries varying from such estimates;
- mine life and life-of-mine plans and estimates;
- the possibility that future exploration, development or mining results will not be consistent with expectations;
- the potential for and effects of labour actions, disputes or shortages, community or other civil protests or demonstrations or other unanticipated difficulties with or interruptions to operations;
- potential for unexpected costs and expenses including, without limitation, for mine closure and reclamation at current and historical operations;
- uncertain political and economic environments;
- changes in laws or policies, foreign taxation, delays or the inability to obtain and maintain necessary governmental approvals and permits;
- regulatory investigations, enforcement, sanctions or related or other litigation;
- competition;
- no guarantee of titles to explore and operate;
- environmental liabilities and regulatory requirements;
- dependence on key individuals;

- conflicts of interests;
- insurance;
- fluctuation in market value of the Company's common shares;
- rising production costs;
- availability of equipment material and skilled technical workers;
- volatile current global financial conditions;
- the potential impact of the COVID-19 pandemic on the Company and/or its operations, and the mining industry and currency fluctuations; and
- other risks pertaining to the mining industry, as well as those factors discussed in the section entitled "Risk Factors" in the AIF.

Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking information in this MD&A and each of the documents incorporated by reference herein are made as of the date of this MD&A or as of the date of the documents incorporated by reference, as the case may be, and the Company does not undertake to update any such forward-looking information, except in accordance with applicable securities laws. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers are cautioned not to place undue reliance on forward-looking information.

The forward-looking information contained in this MD&A and each of the documents incorporated by reference herein is presented for the purpose of assisting persons in understanding the financial position, strategic priorities and objectives of the Company for the periods referenced and such information may not be appropriate for other purposes.
