

CHILE'S NEW COPPER DISCOVERY

*Exceptional Development Project,
Outstanding Exploration Potential*

Investor Presentation | April 2025

marimaca

COPPER CORP.

TSX: MARI

Disclaimer

This presentation includes certain forward-looking statements about future events and/or financial results which are forward-looking in nature and subject to risks and uncertainties. Such forward-looking statements or information, including but not limited to those with respect to the development of the Marimaca project, metal prices, metallurgical results and resource estimates, involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Forward-looking statements include without limitation, statements regarding the Company's future completion of mine feasibility studies, mine development programs, capital and operating costs, production, potential mineralization, resources and reserves, exploration results and future plans, goals and objectives of Marimaca Copper Corp. ("MCC") which may or may not be realized. Forward-looking statements can generally be identified by the use of forward-looking terminology such as "may", "will", "expect", "intend", "estimate", "anticipate", "believe", or "continue" or the negative thereof or variations thereon or similar terminology. Forward-looking information involves known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Company and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. MCC is a copper exploration company and is subject to risks associated with mining in general and pre-development stage projects in particular, including the risk described under the heading "Risk Factors" in the Annual Information Form filed under MCC's company profile on SEDAR at www.SEDAR.com

Unless otherwise indicated, MCC has prepared the technical information in this presentation ("Technical Information") based on information contained in the technical report and news releases (collectively the "Disclosure Documents") available under MCC's company profile on SEDAR at www.sedar.com. Each Disclosure Document was prepared by or under the supervision of a qualified person (a "Qualified Person") as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects of the Canadian Securities Administrators ("NI 43-101"). For readers to fully understand the information in this presentation, they should read the technical report titled "Updated Mineral Resource Estimation for the Marimaca Copper Project, Antofagasta Region, Chile" dated effective June 26, 2023 (the "2023 MRE") (available on www.sedar.com) in its entirety, including all qualifications, assumptions and exclusions that relate to the information set out in this presentation. As a result of the completion of the 2023 MRE, the previous report titled "Preliminary Economic Assessment, Marimaca Project, Antofagasta, II Region, Chile" dated effective August 4, 2020 (the "2020 PEA") no longer reflects the current economic potential of the project, should be seen as historical in nature and should not be relied upon. Readers are advised that mineral resources that are not mineral reserves do not have demonstrated economic viability. The Disclosure Documents are each intended to be read as a whole, and sections should not be read or relied upon out of context. The Technical Information is subject to the assumptions and qualifications contained in the Disclosure Documents. All Dollar amounts in this presentations are US Dollars unless otherwise stated. All maps and diagrams are for illustrative purposes only and not to scale.

Sergio Rivera VP Exploration of Marimaca Copper Corp, a geologist with more than 35 years of experience is the Qualified Person for the purposes of NI 43-101 and has approved this written disclosure.

Introduction: Marimaca Copper Project

Continuous growth of oxide copper resources

DFS underway evaluating simple, low strip ratio, open pit operation

Rapidly advancing toward a construction decision

Low execution risk with proximity to first class infrastructure

Compelling near-mine and satellite resource expansion opportunity

Outstanding location, Tier 1 mining jurisdiction adjacent to proven, existing operations

Marimaca has the potential to be a **low capital intensity, high margin, copper company**

Marimaca: Green Copper

Mining Project of the Future

WATER – recycled seawater supply secured from the Bay of Mejillones ✓

POWER – certified renewable electricity supply available ✓

COMMUNITIES – no community land overlap, skilled local workforce ✓

IMPACT – limited flora & fauna impact expected in the coastal Atacama Desert ✓

CARBON INTENSITY – heap leaching 38% less carbon intensive than traditional processing ✓

Potential for leading ESG positioning across all aspects of the operation

CHILE'S NEW COPPER DISCOVERY
Advancing Development With District Scale Potential

Water Supply: De-risked and sustainable

Recycled seawater from Mejillones will supply the Marimaca Copper Project

Water option secured from the Bay of Mejillones – recycled seawater

- De-risks water supply for the Marimaca Project – intake is already permitted
- No use of continental or fresh water
- Straightforward infrastructure solution with ~25km pipeline at 150l/s capacity to site – one pumping station required

Marimaca: Overview

Infrastructure access lowers execution risk

Close to all aspects required to build a mine

Proximity to first class utilities and infrastructure

Water, Power, Transport, Communications

Within 25km of Port of Mejillones

Access to all major consumables for a SX-EW operation (Sulfuric Acid, Extractants & Dilutants)

Land predominantly government owned/controlled

Access to all major consumables for a SX-EW operation (Sulfuric Acid, Extractants & Dilutants)

Within 40km of Antofagasta

Major regional center, No site accommodation requirement, Well connected international airport

Marimaca: Mineral Resource Growth

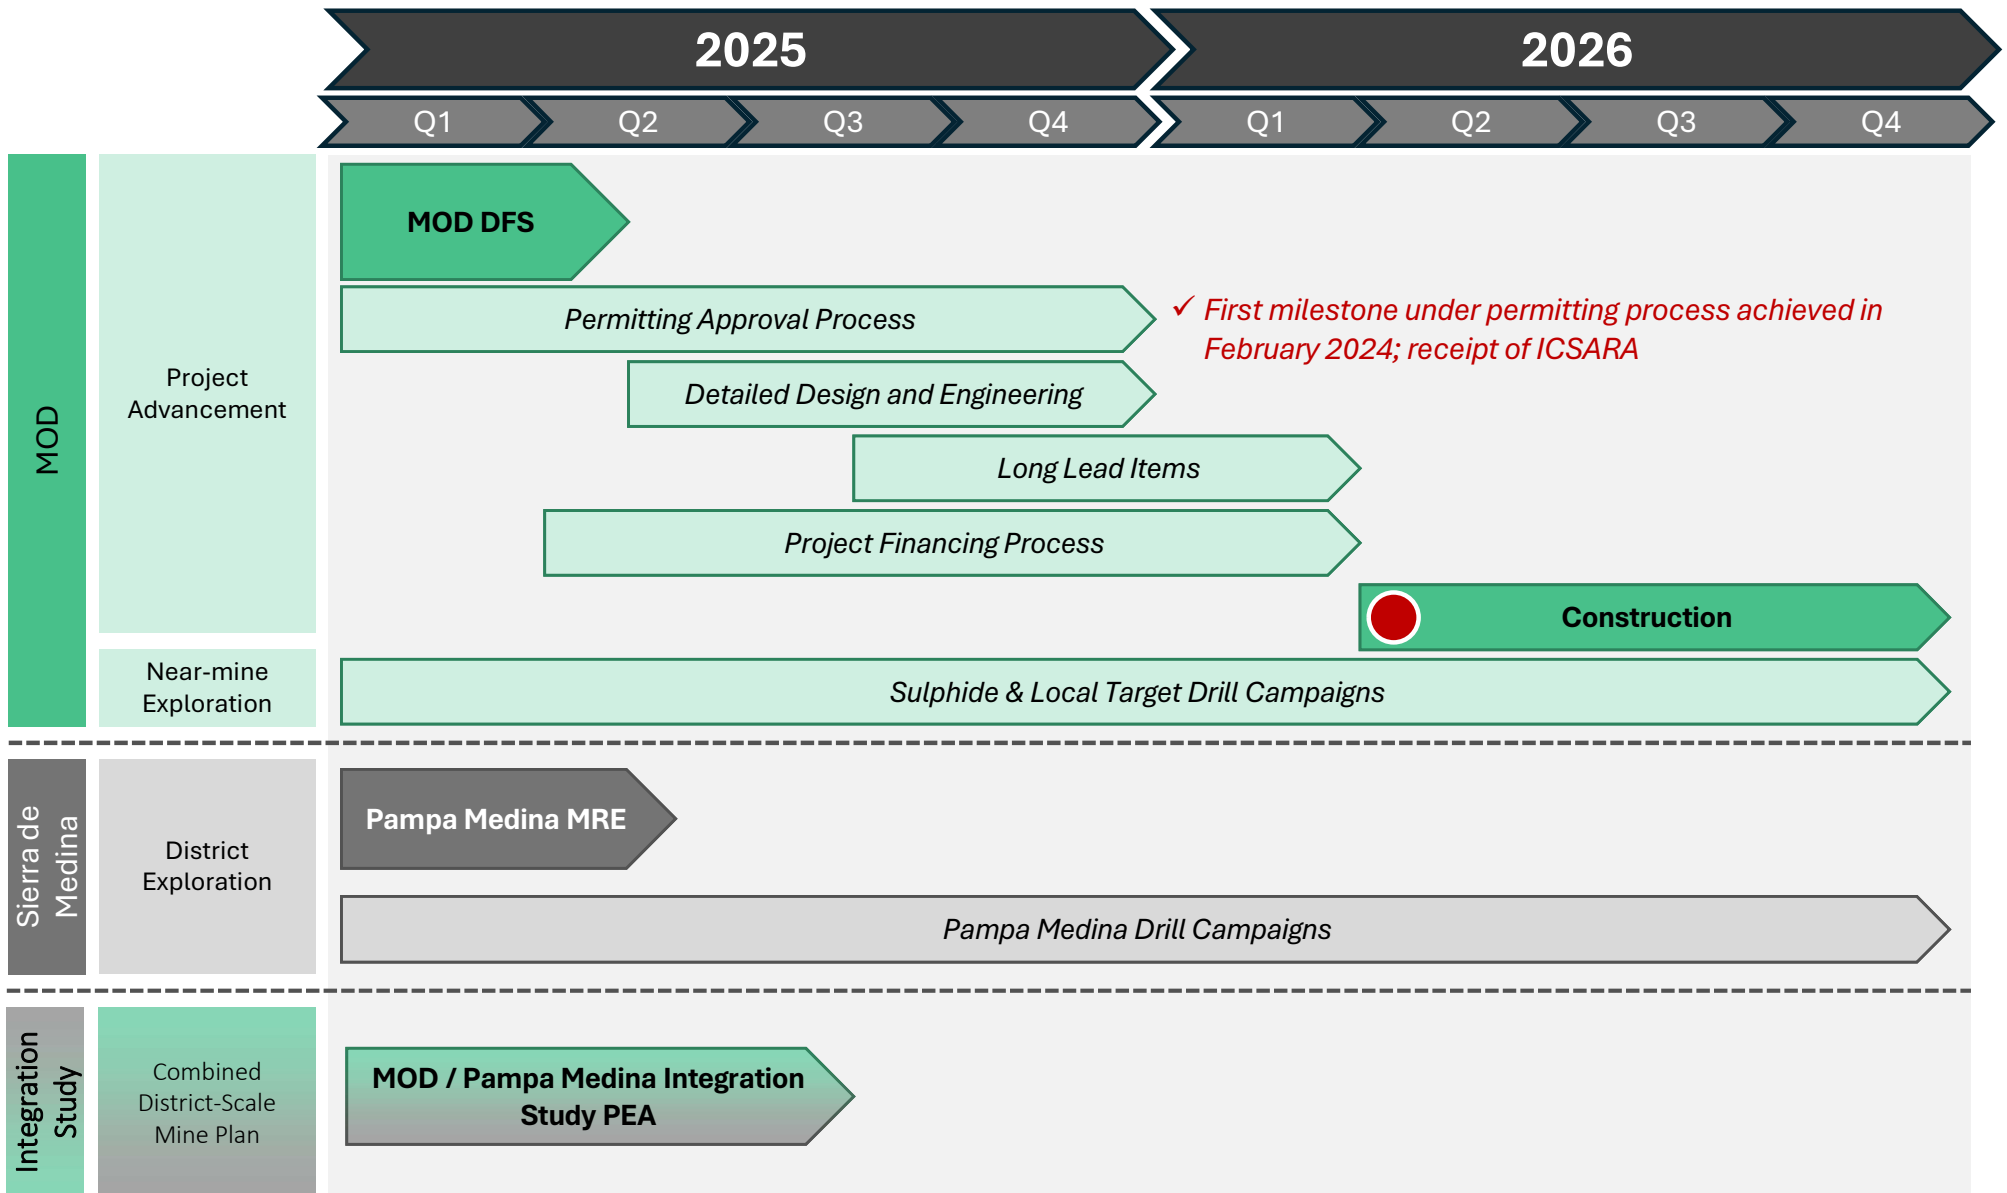

Track record of Consistent resource growth through each drilling campaign

(1) See disclosure from press release dated January 12, 2017 "Coro Reports Maiden Resource Estimate for the Marimaca Project", NI 43-101 "Technical Report for the Marimaca Copper Project, Antofagasta Province, Region II, Chile" February 2017; (2) See disclosure from press release dated April 12, 2018 "Coro Reports a Significantly Increased Resource Estimate for the Marimaca Claim", NI 43-101 Technical Report "Updated Resource Estimate for the Marimaca Copper Project, Antofagasta Province Region II, Chile" May 2018 (3) See disclosure from press release dated December 2, 2019 "Coro Announces Substantial Increase in Resources; Development Studies Underway", NI 43-101 Technical Report "Updated and Expanded Resource Estimate for the Marimaca Copper Project, Antofagasta Province Region II, Chile" January 2020 (4) See disclosure from press release dated October 13, 2022 "Marimaca Announces Significant Increase in Mineral Resources at the Marimaca Copper Project", NI 43-101 Technical Report "Updated and Expanded Resource Estimate for the Marimaca Copper Project, Antofagasta Province Region II, Chile" November 2022. The 2023 MRE is the Company's current technical report and can be found on SEDAR at www.sedar.com under the Company's profile. (5) See the 2023 MRE press release dated May 18, 2023 and 2023 MRE Technical Report on SEDAR.

Marimaca Projects: 2025 / 2026 Work Programs

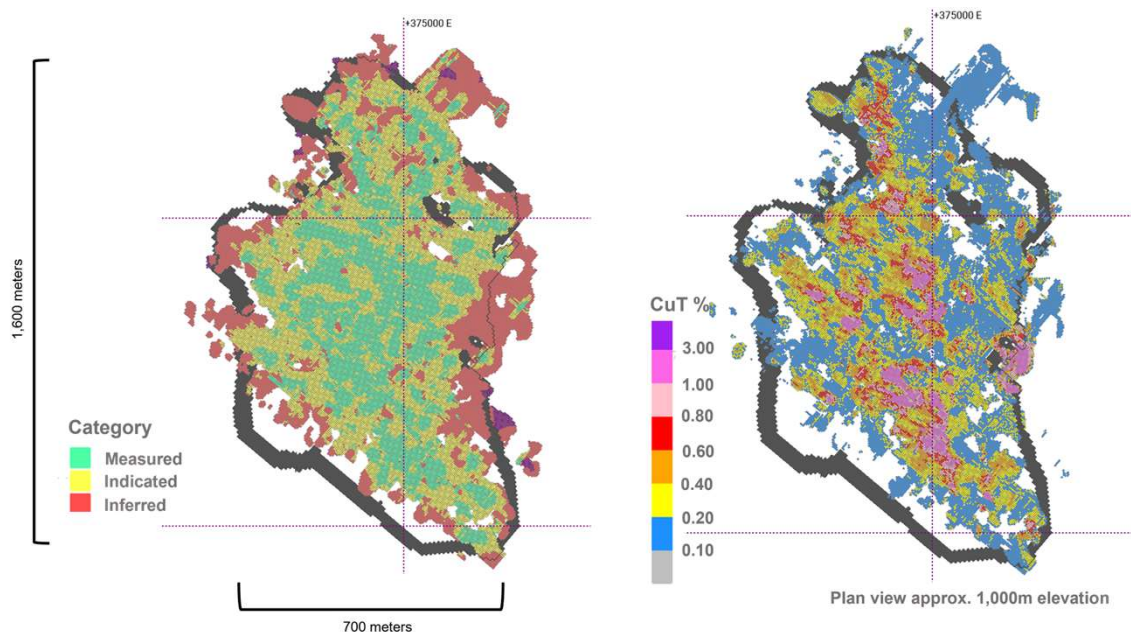

Exploration and Development in Parallel

MOD: 2023 Resource Update – De-risking Milestone

86% of total resource tonnes now in Measured and Indicated categories

2023 MRE Plan View - MOD

→ Significant conversion of Inferred tonnage and contained metal over the 2022 MRE

- 44% increase in M&I Resource tonnes to 200Mt at 0.45% CuT for 900kt of Contained Copper

→ Establishes Marimaca as one of the largest copper discoveries globally in the last decade

- Larger scale production cases (vs. 36ktpa in PEA) will be assessed for DFS

→ Low strip ratio and with all resources captured in a single continuous pit

- Low pre-strip and LOM strip ratio expected to drive significant cost advantages

2023 MRE (0.15% CuT cut off grade)

Mineral Resource Category and Type	Quantity (kt)	CuT (%)	CuS (%)	CuT (t)	CuS (t)
Total Measured	96,954	0.49	0.28	473,912	268,628
Total Indicated	103,358	0.41	0.21	425,797	219,690
Total M&I	200,312	0.45	0.24	899,709	488,319
Total Inferred	37,289	0.38	0.15	141,252	55,802

M&I Resource Ratio

Pit shell constrained resources with demonstrated reasonable prospects for eventual economic extraction (RPEE) are generated using series of Lerchs-Grossmann pit shell optimizations completed by NCL. CuT means total copper and CuS means acid soluble copper. Technical and economic parameters include: copper price US\$4.00/lb; base mining cost US\$1.51/t (avg. \$1.76/t); HL processing cost US\$5.94/t (incl. G&A); ROM processing cost US\$1.65/t (incl. G&A); selling cost US\$0.16/lb Cu; heap leach recovery 76% of CuT; ROM recovery 40% of CuT; and 42°-52° pit slope angle/ With the economic parameters stated above, the Cut-Off grade of the Mineral Resource Estimate is approximately 0.15% CuT. Mineral resources which are not mineral reserves do not have demonstrated economic viability. Due to the uncertainty which may attach to inferred mineral resources, it cannot be assumed that all or any part of an inferred mineral resource will be upgraded to an indicated or measured mineral resource as a result of continued exploration. See the 2023 MRE press release dated May 16, 2023 and 2023 MRE Technical Report on SEDAR.

Marimaca Oxide Deposit: Why is it unique?

Location & access to infrastructure / utilities deliver lower execution risk

MOD Mining: Simple Open Pit Mining

Favorable deposit geometry has potential to improve economics

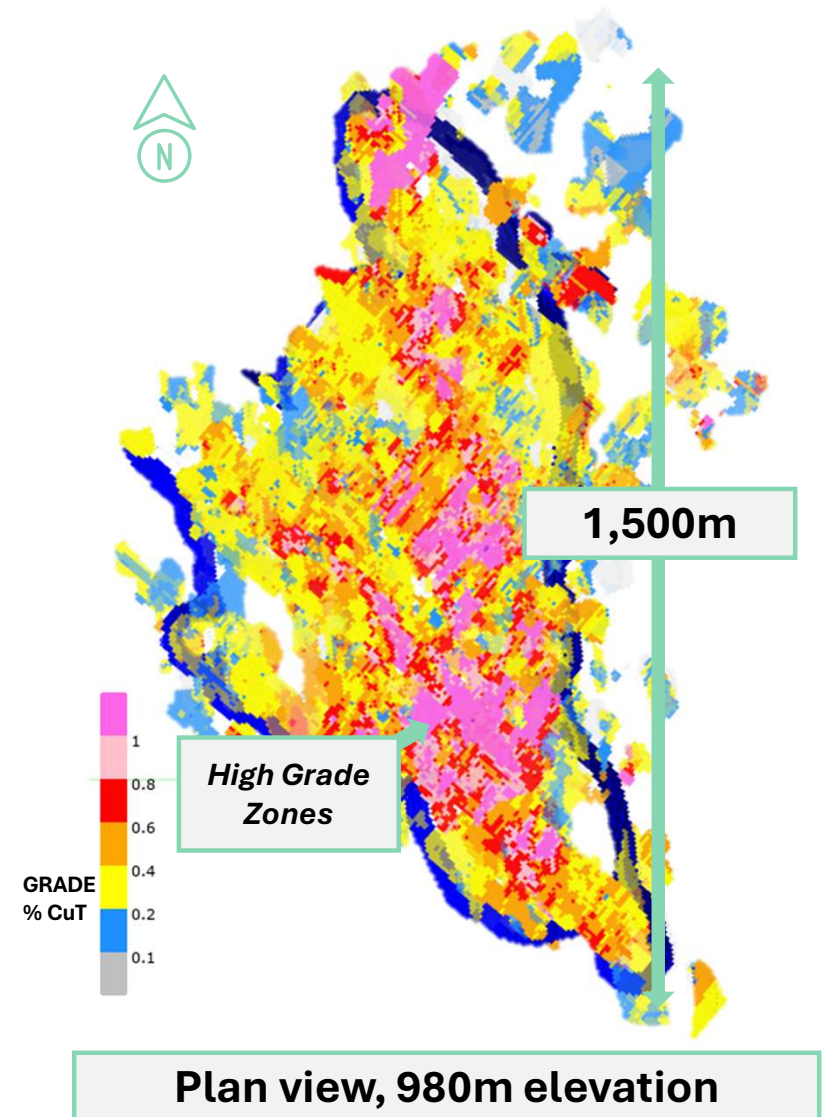

Low strip ratio with ore body exposed at surface

- Favorable geometry of ore body has further reduced strip from MRE

High grade zones from surface expected to be accessible early years of development

- Green oxides with strong met recoveries
- Improves early years head grade delivered to leach pads
- Shortens payback period
- Improves economics

MOD Processing: Simple SX-EW Processing

Low complexity processing supports robust project economics

Marimaca PEA flowsheet

Marimaca Oxides: Extensive Met Work Completed

Marimaca has completed rigorous met testing on materials across the deposit

Tests completed on **materials from across the full extent of the deposit** and **addressed all defined mineral subzones**

1.

Addressed all key operating parameters for heap leach operations

- Agglomeration characteristics
- Granulometry
- Column height
- Irrigation rates
- Acid consumptions
- Testing with and without seawater
- Extensive variability study
- SX Pilot Plant study complete

2.

7 phases of column testing complete

- 4m height columns in Phase VII
- 1.5m columns at different operating parameters
- 30cm “mini” columns

Seven extensive phases of met testing complete

Geometallurgical model development now complete and will underpin planned DFS recovery and acid consumption assumptions

Marimaca: Two-Pronged Strategy

Exploration and Development in Parallel

Project Advancement

Continued de-risking of the MOD

- Project permit submitted – target FID in H1 2026
- Phase 7 metallurgical program near complete
- Water supply engagement complete – water option agreement signed
- Strong expected resource/reserve conversion
- Definitive Feasibility Study (DFS) underway, led by Ausenco

Exploration Potential

NEAR MINE EXPLORATION

Sulphide potential below oxides
Oxide extensions at depth and along strike

Drill campaigns underway at multiple identified targets

DISTRICT SCALE EXPLORATION

Advance ‘hub and spoke’ district development plan to define future satellite resource potential

Pampa Medina MRE underway, targeting release in Q2 2025

Integration Study for Sierra de Medina region underway, expected release in Q3 2024

Exploration focus on adding complimentary resources to the MOD with parallel de-risking and development of Marimaca Oxide Project as quickly as possible

Complementary Resources: District Scale Potential

Strong 'repetition' style discovery potential

Compelling complimentary resource potential adding leachable resources to the MOD production capacity

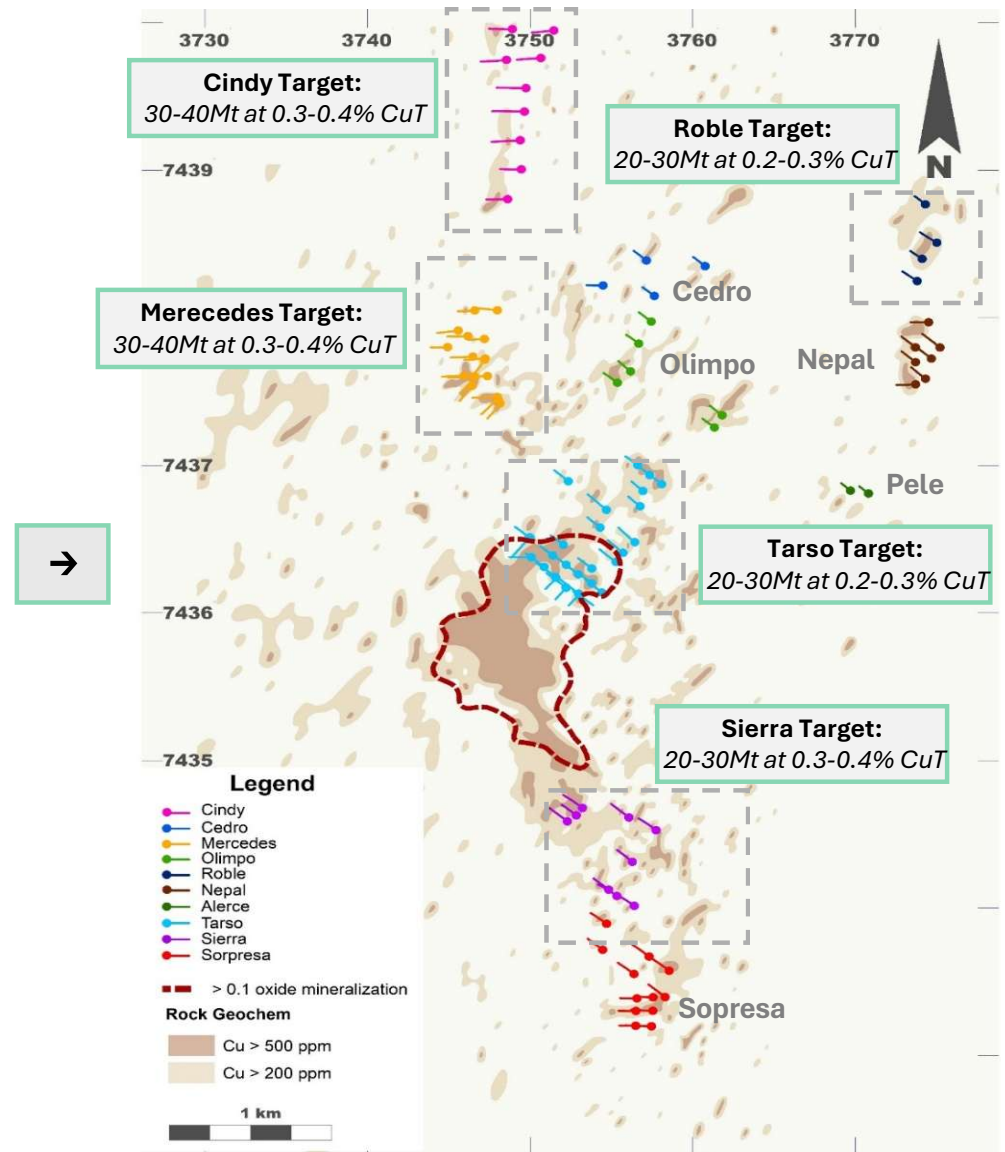

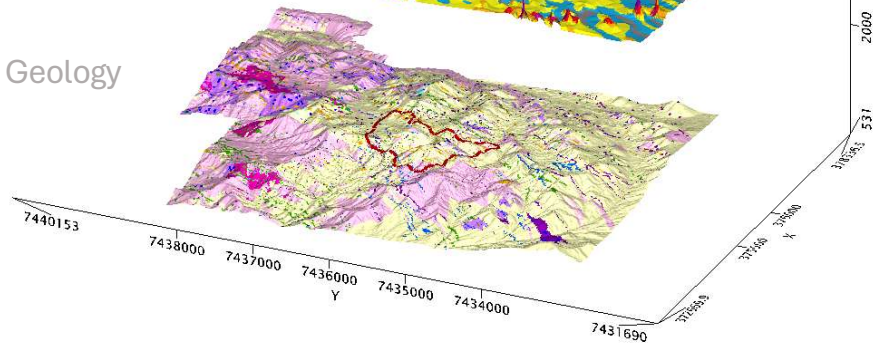

Geophysics

Geochemistry

Geology

Complementary Resources: Sierra de Medina Region

Compelling district scale potential through exploration

Complementary Resources: Sierra de Medina Region

Compelling district scale potential through exploration

Pampa Medina & Madrugador Acquisitions

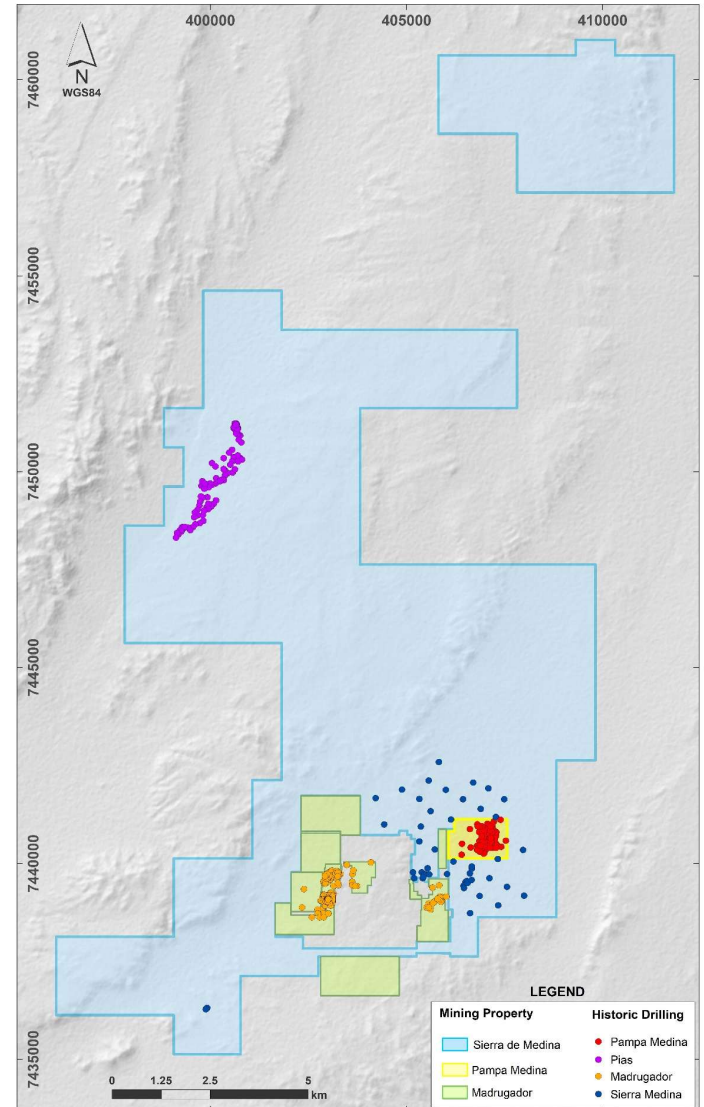

Both located ~25km from the planned MOD processing plant as defined in the ongoing DFS

High grade, shallow, open-pitable historical oxide resource which may be complementary to the MOD development

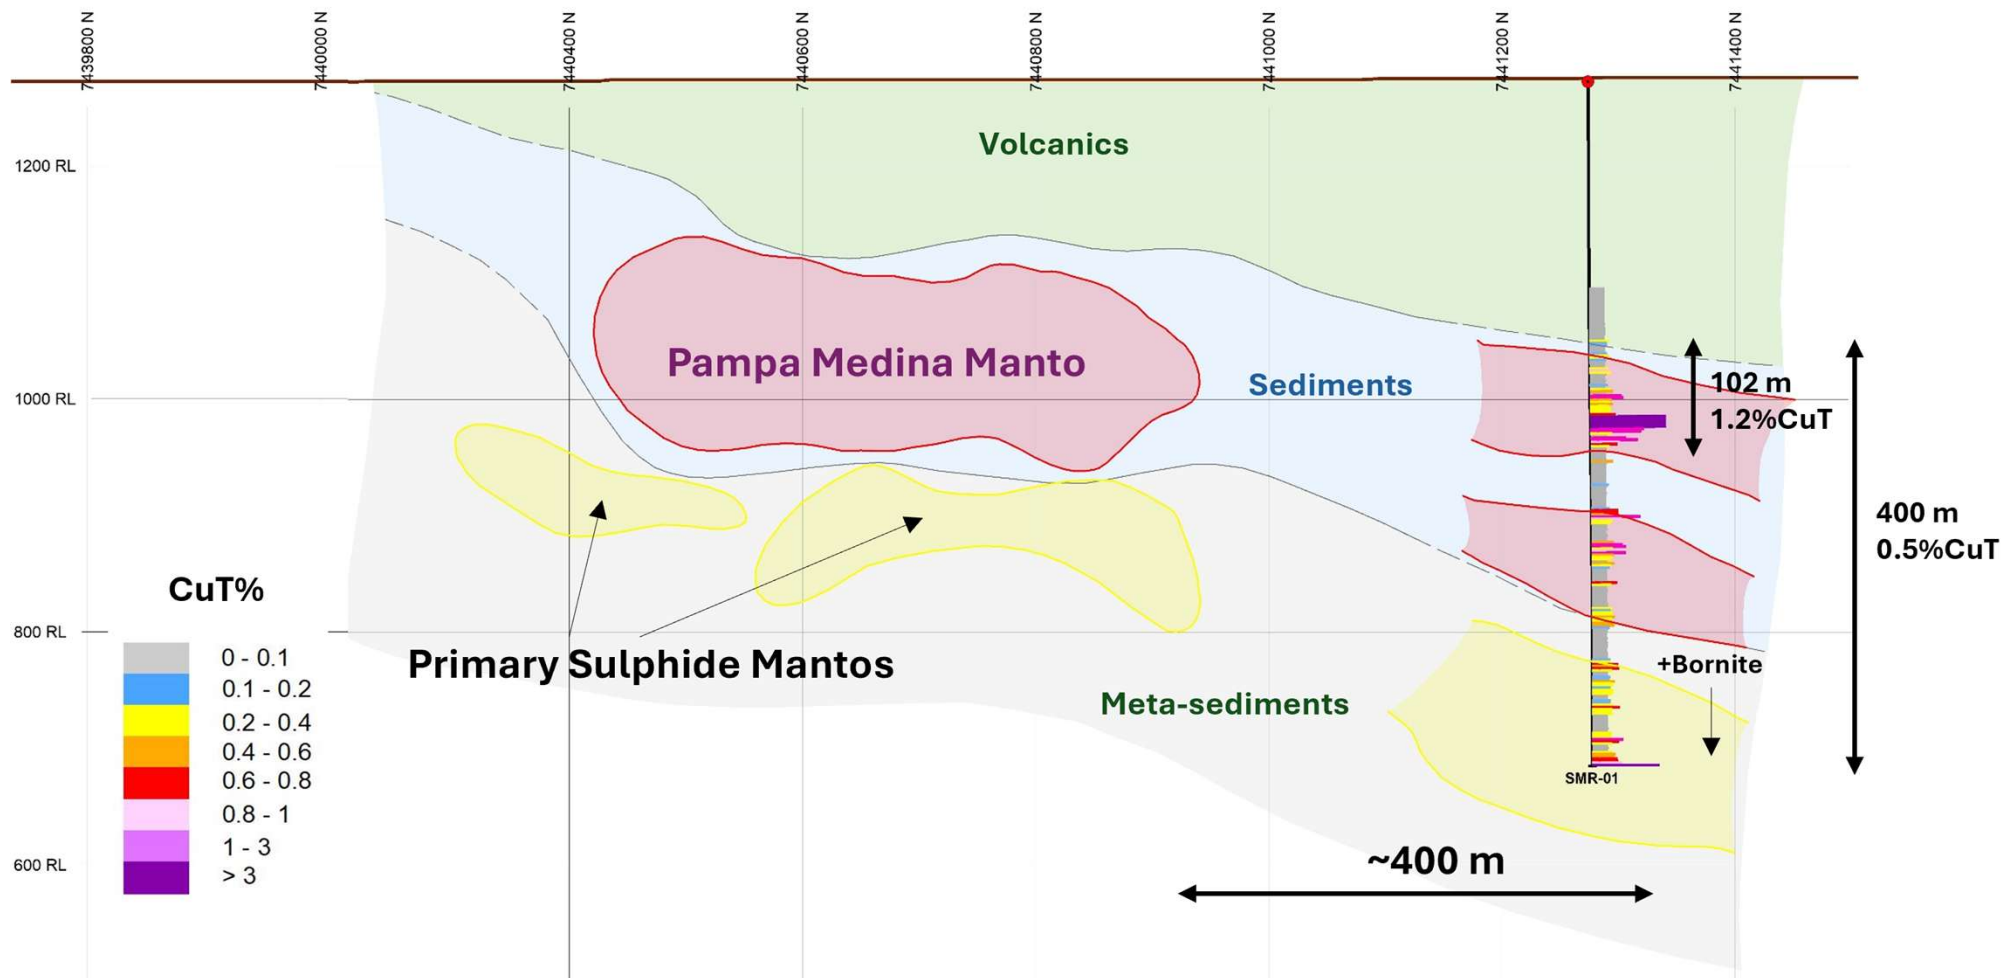

Maiden resource (upgrade of historical) planned for Q1 2025

Complementary Resources: Pampa Medina

Priority drilling target for 2025

Tier 1 Location

District Scale Vision

Green Copper

Low Execution Risk

Marimaca: Summary

Advancing Development & Outstanding Potential

A unique development stage copper asset with a clear development pathway

- Release of MOD DFS targeted for Q2 2024 and Integration Study by Stantec with Pampa Medina is underway
- Confirmation of permitting under the DIA route, fast-tracking the permitting process for the project

Outstanding exploration and resource growth potential both at the MOD and on a district scale

- Total M&I 899.7Mt & Inferred 141.3Mt, more than 85% of mineral resource classified within M&I category
- Targeting an increase in project scale through resource and district scale growth

'Green copper' development project with leading carbon emissions targets

- First quartile of global copper mine site emissions intensity
- Recycled seawater plant permit secured

Low execution risk given Tier 1 location and access to infrastructure

- Chile is consistently rated highly amongst other key copper producing countries
- Close proximity to first-class utilities and infrastructure, and ~25km from port

Appendices

Experienced Board

Experienced and
invested Board and
management team

Deep experience in
copper and Chile

Leading explorational,
regional and financial
experience

Michael Haworth

Non-Executive Chairman

- › Nearly 30 years in resources across advisory and investment
- › Co-founder of Greenstone Resources

Hayden Locke

CEO, President & Director

- › Over 15 years' experience in mining and finance
- › Former Head of Corporate for Papillon Resources, CEO of Emmerson Plc

Clive Newall

Non-Executive Director

- › Co-founder of First Quantum
- › Geologist by training
- › Broad experience in exploration, construction and production in copper

Tim Petterson

Non-Executive Director

- › Deep mining industry experience spanning research, finance and corporate
- › Founder and Exec-Chair of Minera Cobre

Colin Kinley

Non-Executive Director

- › Internationally respected explorationist
- › Currently CEO Kinley & Exploration and Founder and COO of Eco Atlantic

Giancarlo Bruno

Non-Executive Director

- › Significant operating experience in Chile
- › Former CEO of Mantos Copper SA and VP Chile for Capstone Copper

Alan Stephens

Non-Executive Director

- › Co-founded MCC in 2005
- › Exploration geologist, former VP of Exploration for First Quantum

Kieran Daly

Non-Executive Director

- › 25+ years in various executive, commercial and operational roles in the mining industry
- › Currently Managing Director of Assore International Holdings

Experienced Management

Experienced and
invested Board and
management team

Deep experience in
copper and Chile

Leading explorational,
regional and financial
experience

Hayden Locke
CEO, President & Director

- › Nearly 20 years' experience as a senior executive in mining and finance
- › Former Head of Corporate Development for Papillon Resources, CEO of Emmerson Plc

Sergio Rivera
Vice President of Exploration

- › Over 30 years' experience in exploration geology
- › Credited with several large copper discoveries including the Marimaca Deposit

Jose Antonio Merino
Managing Director, Chile and CFO

- › 15 years of international and in-country experience across finance and M&A in natural resources
- › Former General Manager of Business Development and M&A at SQM

Nico Cookson
Head, Corporate Development & Strategy

- › Strong background in corporate finance, M&A and private equity
- › Former Investment Professional at Applan Capital Advisory and Investment Banking at RBC Capital Markets

Solange Gonzalez
General Counsel and Company Secretary

- › Significant experience in Chilean and international law, with a focus on M&A and mining
- › Previously Executive Legal Manager and Falabella and corporate lawyer at Carey and Fasken

Oscar Valenzuela
Vice President of Projects

- › Over 35 years' experience in senior operational roles within the mining industry
- › Previously Director of Projects for Capstone Copper at Mantos Blancos and Mantoverde

Alexis Munoz
Vice President of Project Execution

- › Nearly 30 years' experience in managing the construction and execution of large-scale projects
- › Recently managed construction for Capstone Copper's Mantoverde project

Marimaca Copper – Commitment to Sustainability

Health, Safety and Security

The health, safety and wellbeing of our employees is at the forefront of everything we do. We implement the highest standards of safety to mitigate risks.

Constructive Stakeholder Engagement

We value the trust and support from our local stakeholders. We endeavor to work collaboratively with them to deliver shared value.

Transparency & Accountability

Transparent corporate governance ensures we are accountable to all our stakeholders. We strive to ensure that appropriate checks and balances are carried out to safeguard ownership at all levels of the business.

Our People

We are committed to employing locally, upskilling our workforce, respecting all cultures and promoting diversity and inclusion.

Environmental Stewardship

We operate in an environmentally responsible manner, minimizing the impact of our activities and, where possible, aiming to improve and enhance the environment in which we operate.

Sustainable Development

In exploration, development and eventual production, sustainable practices are of paramount importance.

A close-up photograph of several layers of dark, metallic copper sheets stacked together. The sheets have a slightly textured, weathered appearance with some visible grain and minor surface imperfections. The background is a soft, out-of-focus light blue.
